

Academic and Non-profit Laboratory Assurance Letter

The T7 expression system is based on technology developed at Brookhaven National Laboratory under contract with the U.S. Department of Energy and is the subject of patent applications assigned to Brookhaven Science Associates (BSA). This technology, including bacteria, phages, and plasmids that carry the gene for T7 RNA polymerase, is made available on the following conditions:

- The T7 expression system is to be used for noncommercial research purposes only. A license is required for any commercial use, including use of the T7 system for research purposes or for production purposes by any commercial entity. Information about commercial licenses may be obtained from the Patent Office, Brookhaven National Laboratory, Upton, New York, 11973, Telephone: (631) 344-7134. Contact: Christine Brakel.
- No materials that contain the cloned gene for T7 RNA polymerase may be distributed further to third parties outside of your laboratory, unless the recipient receives a copy of this assurance letter and agrees to be bound by its terms. This limitation applies to any of the following materials that are included in this kit and to any derivatives you may make of them:

<i>E. coli</i> B834(DE3)	<i>E. coli</i> Origami 2(DE3)	<i>E. coli</i> Rosetta-gami [™] (DE3)

The T7 expression system host strains (DE3 lysogens) are covered by US Patent No. 4,952,496. Commercial customers must obtain a license agreement from Brookhaven Science Associates before purchase.

Origami, Origami 2, Origami B, Rosetta, Rosetta 2, Rosetta-gami, Rosetta-gami 2, and Rosetta-gami B strains are proprietary strains sold under license by EMD Biosciences, Inc., Novagen brand.
